Journal of Management Inquiry 23(4) 409–427

The graph plots the number of employees per group (y-axis) against the total number of employees (x-axis). The x-axis ranges from 0 to 100 in increments of 20. The y-axis ranges from 0 to 10 in increments of 2. A solid curve starts at the origin (0,0) and rises steeply at first, then gradually levels off, approaching a value of 10 on the y-axis as the x-axis value increases towards 100. A dashed horizontal line is drawn at y=10, which the curve approaches asymptotically.
